

Business process monitoring

VZOR® Business Monitor

VZOR® Business Monitor is a complementary solution to our suite, which provides visibility to the main business indicators (KPI's).

The product has all the necessary functionalities for the integration and centralization of data from different data sources.

VZOR® Business Monitor provides users with online access to personalized dashboards of each of the business processes monitored.

It is important to note that it is a SaaS and On-Premise solution.
